

PLEASE READ THIS FIRST

Due to COVID-19 (“Corona Virus”) pandemic and related Federal and State regulations we have temporary changed some aspects of our operations. The changes are listed below:

1. The Open Access Colonoscopy program is temporarily discontinued. Patients needing screening or surveillance colonoscopy should now schedule an office visit prior to scheduling the procedure.
2. In our effort to protect patients and our staff, only patients with new or existing symptoms and/or diseases which require direct physical examination of the patient would be scheduled for a standard, face-to-face office visit. Patients will be advised whether they belong to that category during the initial telephone encounter with our staff.
3. Majority of our new and existing patients requiring office visits will be now transitioned to Telemedicine Visits (“Virtual Visits” using computers or smart phones, and not requiring patients to be physically present in our office). We will make any effort to contact the already scheduled patient and guide them through the transition process. For details concerning Telemedicine Program please go to “Telemedicine” tab in this Web site.
